Simply plug this Network Storage Server into your home network, and all the PCs in your home will have access to a full-function network hard disk. Every user in your home network will simultaneously be able to store, save and open files, and even share the use of programmes stored on the Storage Server. The Server can also be accessed via the Internet, allowing you to access your data from anywhere in the world. What's more, the Storage Server can also be connected to any PC via USB, giving you instant access to flexible storage capacity. With the two USB ports it is easy to share two external USB hard disks and/or flash disks with all the other PC's in your network. The connected storage devices can easily be accessed via the internet from any location in the world.
